

Boosting restaurant **efficiency** with **AI menu recommendations** & restaurant **360 predictive Analytics**

- Menuz builds detailed customer personas, allowing our AI to deliver personalized dish recommendations to your customers, based on allergies, food preferences, and dietary restrictions.
- This data is later utilized to deliver predictive analytics (sales/dish/customer forecasts) in form of comprehensive dashboards.

 - QR code menu
 - AI personalized user dish recommendations
 - In-app ordering
2. Dinerz: Customer & Order Management app
 - 360 AI dashboard analytics
 - Customer retargeting
 - Order management system

Why do we do this?

Because, we experience indecisiveness when ordering at restaurants, especially those from different cultures, i.e. when traveling and going to the local Thai or Sichuanese restaurant. And like us, there's millions of people. That's why Ryo and I decided to completely reimagine the dine-in experience, to create a more pleasant experiences for your customers and use the data collected to make your business more efficient.

~ Roger, Menuz Co-founder
